AC BHARATH

PROFILE SUMMARY

- **M.Tech. (Information Technology) professional with over 11 years of experience in Software & Automation Testing and Quality Assurance; Gained expertise with testing Client-Server products, Web applications, Mobile & API testing**
- Skilled in working on various **QA tools like Selenium WebDriver, Appium, UFT, SoapUI, Postman** with experience in working on Oracle database; Worked on **Agile-Scrum, Waterfall Software Development Process**
- Expertise in end-to-end **Software Testing Lifecycle** from the stage of inception to requirement gathering, **test planning, strategy, release management, defect life cycle**, root cause analysis & **test report** related documentation for every releases
- Defined the scope of testing and produced / managed test; skilled to use **Java coding, Shell scripting and VB Script**
- Acting as **Subject Matter Expert (SME)** in testing processes and methodology; lead team in incorporating automation testing industry's best practices, techniques, and methodology into existing QA / Software Testing process
- **Converted more than 60% of QA manual process to automation** over integrated automation framework implementation, test utilities & tools
- **Deployed on-site at client location** as Validation Engineer for **IBM Corp. Sdn. Bhd.** Malaysia from Mar'10 to Mar'11 at **Quintegra Solutions**
- Published an **research paper for IEEE Journal in International Conference**
- Proven capabilities in **managing stakeholders** (IT, Business & Vendors)
- **Maintaining key relations with clients** by acquiring feedback on issues and taking suitable actions;
- Key player in enduring **quality of Jio's customer care** related services & applications
- Gained exposure in leading & mentoring the **Off-shore Team and Internal Teams**

EDUCATION

2014

M.Tech., in Information Technology
Madras Institute of Technology (MIT), Anna University

2010

P.G. Diploma Enterprise Resource Planning
College of Engineering, Guindy (CEG), Anna University

2009

M.B.A., in Human Resource & Systems
Madras Institute of Technology (MIT), Anna University

2007

B.E., in Computer Science & Engineering
A.V.C College of Engineering, Anna University

JOB OBJECTIVE

Self-driven and result oriented individual, looking forward for challenging lead role in Software Quality Assurance, with a reputed organization that provides ample opportunity to learn & contribute

KEY SKILL

QA & TESTING	●	●	●	●	●
SELENIUM	●	●	●	●	●
API TESTING	●	●	●	●	●
JAVA	●	●	●	●	●
AGILE	●	●	●	●	●
DATABASE	●	●	●	●	●

COMPETENCIES

TEAM LEADERSHIP

COMMUNICATOR

TIME MANAGEMENT

CRITICAL THINKING

MENTOR & MOTIVATOR

Professional Experience

- Since Dec'16 : Reliance Jio Info Communication, Navi Mumbai
as Senior Test Automation Engineer
- Mar'16 - Aug'16 : Ericsson India Pvt. Ltd., Chennai through GlobalLogics
as QA Consultant
- Jan'14 - Mar'16 : ADP Solutions, Chennai
as Software Quality Analyst
- Jan'12 - Jul'13 : iOPEX Technologies, Chennai
as Software Quality Analyst
- Jul'07 - May'11 : Quintegra Solutions
as Junior Test Engineer

KEY RESULT AREAS

- Directing **high-performing Software Testing / Quality Assurance Team** through all phases of application development; ensuring that information systems, products & services meet or exceeds organization/industry quality standards & end-user requirements
- Supervising the quality** (functional, usability and performance) and Monitoring testing activities to ensure the quality and functionality of assigned systems; ensured timely and accurate test communication with Development Leads, Project Manager and Senior Management throughout the project life-cycle
- Resourceful in Test automation, Black Box Testing, Functional, System, System Integration and UAT
- Preparing, designing and leading the Test Strategy & Test Plan for all systems;** Reviewing activities such as Requirements Review, Design Review, **Test Strategy Review and Test Case Review**
- Interacting with PO's, BA's, SME's, Developers** to discuss the feature scope of testing & defect clarifications
- Experience in automating **web services** (soap & restful) automation using **SoapUI and Groovy scripting**
- Experience in automating **restful web services** automation using Rest Assured
- Good working Knowledge in Automating Mobile Applications (Android & iOS) using Appium
- Experience in developing **automation frameworks** and reviewing/re-using existing framework components
- Experience in **mobile testing** using physical devices testing on Mobile App and Web app in both **Android and IOS**
- Experience on **server-side as well as client-side testing**
- Involved in implementation of **Data Driven Framework, Page Object Model (POM) and Keyword Driven Framework** using **Java, Javascript, Selenium Webdriver, TestNG, Maven, Jenkins**
- Scheduling, triggering bulk **automation test suites with Jenkins as part of CI/CD process** (regression suites)
- Used Apache POI to interact with Excel and Extent Reports to generate html reports
- Performing **Smoke, Sanity, Integration and Regression testing**, Compatibility testing, End-to-end testing
- Crafting **SQL Queries** in database testing and data simulation with Select, Insert, Update, Modify, Joins statements
- Working with **Gray Box Testing**, preparing **Requirement traceability matrix (RTM)** and Non-functional Testing
- Expertise in feature requirement review, use case review, test scenario design
- Managing **Defect Lifecycle** including Defect Creation, Defect Tracking and Root Cause Analysis of the defects; and preparing QA test status
- Resolving all support and operational issues in liaison with Project Managers & Business Group

- **Gathering and analyzing data in support of business cases**, writing test plans and scripts for tracking defects and fixes in product development, software application development, information systems, and operations systems
- Establishing and **enforcing Standard Test Processes and Deliverables** (including defect management and quality metric reporting) within the gated process to streamline testing and support automation testing efforts
- Communicating test progress, test results, and other relevant information to project stakeholders and higher management; supporting & identifying continuous improvements within testing processes
- Good interpersonal skills and be able to build consensus across teams
- Experience in creative approach to problem-solving and decision-making skills with a strong customer focus and commitment to deliver.
- Good skill in Coaching, mentoring and foster the culture of transparency, continual improvement, self-organization and collaboration within teams.
- **Good experience with Agile industry best practices**, to include version control, automated builds, automated testing, and continuous integration

TECHNICAL SKILLS

- **Operating System** : UNIX, Windows 7 & 8, Linux, MacOS
- **Unix Flavours** : CentOS, Solaris, AIX, RHEL
- **Programming Languages** : C++, Java, VB Script, Shell Script
- **Methodologies** : Agile Scrum, Iterative, Waterfall, V models
- **Testing Tools** : QTP (UFT) 11.53, Selenium Web driver, Appium, SOAP UI, Postman
- **Automation Framework** : Keyword Driven (Hybrid) and TESTNG
- **Databases** : SQL Queries, SQL Server, Oracle 10g, MySQL
- **Internet Technologies** : HTML, CSS, XML, Java Script
- **SourceCode Management**: Team Foundation Server, GIT, SVN
- **Test Management Tools** : Rally, JIRA, RQM, Rational Clear Quest, Quality Center, Bugzilla 3.2, RedMine
- **IDEs & Other Tools** : Eclipse, Notepad++, Putty, WinSCP,
- **Others** : ERP, UML, Jenkins, Source Tree, SQL Server Express, Excel Addons, MySQL Query Browser

CERTIFICATIONS

- ISTQB- Advanced Level Technical Test Analyst
- Oracle Certified Professional Java SE 8 Programmer
- V Skill's Certified Selenium Professional

PERSONAL DETAILS

- **Date of Birth** : 6th March 1986
- **Gender** : Male
- **Nationality** : Indian
- **Alternate Mobile** : 915 951 4774
- **Languages Known** : English, Tamil, Kannada and Hindi
- **Permanent Address** : 33/12, Welcome Colony, Anna Nagar West Extn., Chennai – 600 101
- **Passport Number** : Z3382105 (Exp 02 August 2026)

~ Please refer to Annexure for the details of the project's experiences~

PROJECT EXPERIENCE

Project#6 – Jio's Customer Profile Activation & Assisted Care Dec 2016 to Till date

Environment : **Jio.Com** Web Portal, MyJio Mobile Apk, **Oracle 10g, Tibco, SAP CRM**

Role : Senior Automation Test Engineer (Automation & Manual)

Team Size : Six

Client : **Reliance Jio Infocomm**, India

Tools Used : Eclipse, Java, Selenium, Appium, Soap UI, Postman, Maven, Jenkins, SVN

Project Description

Customer portal and Activation track consisting of **Jio.com** web portal and **MyJio** mobile (Android & IOS) application with customer's subscriptions and profile related functionalities are managed. Assisted Care track consisting of **Interactive Voice Response (IVR)** and **Novelvox** applications, in which the customers requests are being addressed basis on the assistance provided by the customer care agents. All those customer queries, profile management, service requests, notifications are maintained processed by integration with other systems, such as customer relationship management systems (CRMs) through Tibco middleware system, as a client-server system designed with multiple **SOAP & REST API** webservices component-based architecture with **relational database** (Oracle).

Responsibilities and Contributions

- **Leading 6 members team** of regular tasks assignments, Analysis progress in each sprints.
- Picking user stories from product backlog, and **analyzing business requirement** behind user stories and writing **automation script** for validating the **acceptance criteria**
- Project planning, **Resource planning and Test planning** with streamlining the **requirements in RTM** and guiding team for **pre-requisite data** analysis
- Performing **Integration test, End-to-End & Regression** test in **Jio.com & MyJio apps**
- Involved in **Regression testing** with **Selenium, Appium & SOAP API test suites**
- Used **Postman & SOAPUI for SOAP / REST** webservice validation and database SQL queries
- Developing automation scripts in **Java/Selenium, Appium using TESTNG** for functional & regression suite while testing **jio.com web portal & MyJio apk related mobile testing**
- Creating test scripts with proper **element locators & Selenium Webdriver** methods
- **Scheduling & executing smoke test suite** in Jenkins, analyzing the skipped & failed test cases results and publishing execution analysis report across different track teams
- Enhancing test scripts for **global execution** and maintaining in SVN code management
- Executing testing plans to ensure compliance quality standards and Business requirements

Project#5 – Ericsson Customer Management System (ECMS)

Environment	:	Java, Oracle 10.2.4, Solaris, RHEL, CRM
Role	:	Senior Quality Analyst (Automation & Manual Testing)
Team Size	:	Six
Client	:	Ericsson Telecommunication , Sweden
Tools Used	:	Eclipse, Java / Selenium web driver, Oracle, Shell Script

Project Description

Ericsson Customer Management System is an end-to-end customer care system for Ericsson Charging System that succeeds Ericsson Mobile IN Service Administration Tool (MINSAT). Ericsson Customer Management System is an open system, that simplifies integration with other systems, such as customer relationship management systems (CRMs), and enables the use of enterprise application integration (EAI) middleware platforms. It is designed as a client-server system with a component-based architecture based on a relational database (Oracle). The front end consists of Web applications with a graphical user interface running in any modern Web browser. These applications simplify the completion of business processes that require a significant amount of input from the customer care user. Mass transactions are handled by server applications running in a UNIX environment.

Responsibilities and Contributions

- Picking user stories and Trouble Reports from design backlog, identifying testing scenarios and QA activities.
- Installing RHEL & Solaris OS for ECMS **installation with fresh & upgrade path**
- Participating in **Agile-Scrum** related product backlog, **sprint plan, daily scrum meetings**
- Setting up Standard, High available **test environments with Jenkins**
- Configuring **unit test data and simulators for unreachable nodes**
- Performing **Smoke, Regression, Maintainability, Robustness testing**.
- Developing **keyword driven automation framework in Java**.
- Creating **automation test suites**, executing and analyzing results.

Project#4 – ADP – Streamline Data Hub

Jan 2014 to Mar 2016

Environment	:	C# .Net, MS SQL-Server
Role	:	SQA (Automation & Manual Testing)
Team Size	:	Eight
Tools Used	:	QTP 11.53, Selenium, Rally, QC, SQL Server Express

Project Description

Streamline solution is designed to manipulate employee and payroll data from the System of Records (SOR), and then sending the processed data in a SIF Extract , accepted by the Local Payroll Partners to the Internet/Input File Exchange (IFX). This process is carried out by feeding the employee data via Import, New Starter and Employee Management Screens. Verification of the data is then carried out before sending the data to IFX. This verification is done using audits / reports built in streamline. The data manipulations are tracked in payroll changes reports, produced every time till the data changes are found appropriate. Once the data is validated, Streamline produces the SIF (Streamline Input File) format. This file is sent automatically to the IFX server.

Responsibilities and Contributions

- **Picking user stories and** analyzing business need behind the user stories / features and writing automation script to validate the acceptance criteria as per functionality
- **Scheduling and executing Smoke test suite, analyzing result**, debugging script issues and sharing the report to whole team
- **Reviewing test scenarios**, test cases against **user story's acceptance criteria**.
- **Building/Rebuilding test environment** using TFS solutions for latest **code deployment**
- Creating and executing **automation test scenario scripts using QTP 11.53**
- Maintaining the **integrated test automation hybrid framework**
- Involved in triggering automation test suite - Deployment & **execution jobs in Jenkins**
- **Generating automation** test reports and **Analyzing the automation test report**.
- Interacting with **Business Analyst's, SME's** & development team **about the defects**.
- Performing **Smoke Testing, Sanity testing, Database Testing, Regression testing, End to End Testing, Retesting and Defect verification**.
- **Test set preparation** for execution, manual verification and **test results maintenance**
- **Logging the defects**, prioritizing defects and updating in the backlog.

Project#3 - iOPEX - Traktime

Jan 2012 to Jul 2013

Environment : **UNIX(CentOS), Java, Selenium & Shell Scripting, MySQL**

Role : Senior Quality Analyst (Automation & Manual testing)

Team Size : Four

Client : Internal Application, iOPEX Technologies, **Manila**

Tools Used : **Eclipse, Selenium Webdriver, Shell scripting, Jira**

Project Description

Traktime is a web-based application which tracks the Punches of employees and provides the visibility for the operations to track how much time is being spent for each activity, the input provided by the employees as they perform on the activities. It provides an interface where the employees can Punch their movements and also request for Change Requests whenever required. The interface is also provided to managers, where s/he can approve/reject the Change Requests as well as take action on deviations, detected by the Traktime while comparing the Punches with their Switch data and Biometric Swipe-card entries.

Responsibilities and Contributions

- Understanding requirements, **preparing test scenarios & test cases, with RTM.**
- Setting-up the testing environment with help of **Shell Script & MySQL database.**
- Creation & Execution of **automation test cases / test suits with Selenium.**
- Generating automation test reports and **analyzing the automation test report.**
- Execution of **Smoke, Sanity, End to End Testing**, Compatibility Testing, Integration Testing, **Regression Testing and Bug verification.**
- Logging the defects, prioritizing defects and discussion with developers.
- Leading the QAs & participating in team meeting and deployment meetings.

Project#2- IBM TIVOLI - Prospect for Alcatel Lucent

Jul 2008 to Mar 2011

Environment	:	UNIX (Solaris 10), Java, Oracle 10g.
Role	:	Validation Engineer (Onsite)
Team Size	:	Six
Client	:	IBM Corp (Previously Vallent Corp), Ireland
Tools Used	:	Rational Clear Quest, Putty, Shell Scripting, QTP, QC

Project Description

IBM Tivoli (Prospect) is a Wireless Performance management product used for Traffic monitoring in the Wireless networks. The product extracts statistical information produced by telecommunication equipment and has connectivity to switches/routers. Prospect stores network performance statistics and network hierarchy information in Oracle database.

Prospect Core is comprised of a database schema, supporting PL/SQL packages and middleware components that provide services to vendor and functional modules. VB Client provides the user interface for defining, running, and viewing reports using data from a Prospect server.

Responsibilities and Contributions

- Analyzing Functional requirements, **preparation of Test data & Test Cases.**
- Execution of **Smoke, Sanity, Integration, Regression and System test cases.**
- Conducted **Knowledge Transfer** and Training Sessions to Off-Shore Team.
- Coordinated Testing Tasks with Off-Shore Team located in Chennai, India.
- Attending the checkpoint Charlie, Delta and **weekly project status** meetings.
- Involved in developing and executing **QTP test Scripts** for the UI Test Cases
- Testing on various **UNIX flavours** (AIX 5.3, 6.1, RHEL 4.x, 5.x, Solaris 9, 10)
- **Using SQL to verify the output of various reports against oracle database**

Project#1- IBM TIVOLI – TNPMW

Jul 2007 to Jul 2008

Environment : **UNIX** (Solaris 10), Java, Oracle 10g
Role : Test Engineer
Team Size : Twelve
Client : **IBM Corp (Previously Vallent Corp), Ireland**
Tools Used : **QC, Putty, Shell Scripting, QTP**

Project Description

Wireless Network Base Station contains a Data Collector tool which collects the network information and converts it into a raw data file in text file format. The parser parses the raw data file and generates the intermediate files. The loader loads all the data into the database. Reports generated using the Key Performance Indicators are used to monitor the performance of the wireless network.

Responsibilities and Contributions

- Understanding requirements and **preparing test cases with Quality Center.**
- Execution of **Smoke, Sanity, Integration, Regression and System test cases.**
- **Derive test scenarios** from the software requirements.
- Preparation of **test data.**
- **Using SQL to verify the output of various reports against the database.**
